TOUCH

My dear colleagues,

For the past twelve weeks, I have been Yifei Shen's Project Lead for a Project Based Learning (PBL) program in computer vision and image processing. In this time, I have grown to appreciate Yifei Shen not only as a student who was a pleasure to teach, but also as an individual with striking work ethic.

I specialize in Computer Vision in my academic endeavors, and for many years, I have been associated with leading European universities and the German and American automotive industry. During this time, I have come across a wide range of individuals. With them all in mind, I say that Yifei Shen has definitely held his own in this challenging PBL program..

Over the course of the 12-week program Yifei Shen had a great deal of responsibility, including working on a project focused on creating new font styles for chinese characters using generative adversarial networks and convolutional encoder-decoders, writing a report summarizing his work, and presenting his project to myself and other colleagues. I interacted with Yifei Shen on a weekly basis throughout the entirety of the program through online live sessions and offline support, and have witnessed his growth first-hand.

Yifei Shen was a team member focusing on training Generative Adversarial Networks. He learned about the classical network architectures and ways to train machine learning algorithms for synthesizing images, in particular automatically generating new fonts for Chinese characters. He was hard-working, well-organized, and a good team player.

I anticipate that Yifei Shen will leverage the skills and experiences from his time in the PBL in many exciting and fruitful aspects of his life. He expressed desire to contribute to field, and has identified his first endeavor in preparing to do so as pursuing this opportunity. I believe Yifei Shen would be a good candidate for this.

It is with great pleasure that I recommend Yifei Shen to you. Please do not hesitate to let me know if I can be of further assistance to you regarding his application. You can reach the PBL team at programs@touchedu.io.

Thank you very much for your time and consideration.
